

Comprehensive Audit Protection

RxProtect[™]
AlignRx

Are PBM audits costing you more than they should? With RxProtect, they don't have to. **RxProtect is a comprehensive audit solution designed to protect your hard-earned revenue and turn every audit into a non-event.** Our team of Certified Pharmacy Technicians equips your pharmacy with proactive strategies so you stay compliant, confident, and audit-ready.

Audits demand considerable time, which you don't always have given your commitment to patient care. Our experienced team thoroughly analyzes your claims data and studies your pharmacy operations at a granular level—providing preventative strategies that reduce your risk of future audits and limit unjustified recoupments.

Stay Ahead of Audits

Stop audit issues before they start with tools that identify, flag, and resolve risks early.

- **Custom weekly high-risk claim reports** analyze your pharmacy's data to pinpoint high-risk claims and provide actionable steps to strengthen documentation.
- **Expert billing and dosing guides** help prevent your team from making mistakes when filling prescriptions.
- **Audit assistance newsletter** delivers timely updates on audit trends, risk patterns, and essential compliance tips delivered straight to your inbox.

Prepare, Prevent, Protect

From audit training to appeal support, AlignRx is with you every step of the way.

- **On-demand staff training** equips your team to serve as your first line of defense, providing the latest hardcopy documentation requirements from state, federal, and PBM sources.
- **Immediate audit response strategies** ensure your documentation is 100% compliant before the auditor arrives. Having a preparation plan based on the specific PBM and type of audit is the single most important step to preventing a recovery.
- **Pre-Audit Documentation Reviews** identify potential recovery risks before an auditor sees them and give you a prioritized list of items to correct, eliminating guesswork and reinforcing best practices.
- **Strategic appeal support** identifies high-risk audit items that may be a red flag for PBMs.
